

What are the odds?

**OUR MOUNTAIN SCENERY WILL REMAIN STUNNING,
OUR DRINKING WATER WILL NOT BE JEOPARDIZED AND
WE CONTINUE TO HAVE A VARIETY OF WILDLIFE TO ENJOY.**

Our forest looks green,
the water in the Arkansas is clear.

If you take a closer look, the green trees aren't necessarily healthy, non-native weeds are spreading and unmaintained roads and trails are sources of soil erosion. It's happening on private and public land.

LET'S WORK TOGETHER TO MAKE OUR LAND HEALTHIER SO WE DO NOT LOSE THE ECONOMIC AND PERSONAL BENEFITS WE TEND TO TAKE FOR GRANTED.

If you own forested property, contact the Colorado State Forest Service to find out what you can do to take better care of your forest.

If your business depends on an appealing landscape or you keep yourself healthy by recreating on public lands, here's how you can help:

- Join Volunteers for Outdoor Colorado
- Stir and check for hotspots while putting out your campfire.
- Be able to identify weeds and avoid spreading.
- Leave the off-road driving to the commercial makers.
- Help promote forest care at your business.
- Donate to the **NATIONAL FOREST FOUNDATION**. Donations to the **FOUNDATION** will be used to fund the following projects:

- 1
- 2
- 3
- 4
- 5
